We are not able to ascertain useful economic life of fixed assets and hence depreciation and impairment as calculated by the company could not completely verified.

The balances in all current assets and current liabilities including statutory liabilities are subject to confirmation, reconciliation.

We have relied upon the representation given by the management that, inventory of Rs.44,22,700/- will be having realizable value in the ordinary course of business.

#### Notes forming part of the Financial Statements

#### 1. Nature of Operations:

Filtron Engineers Limited is engaged in manufacturing and supply of Food, Dairy, Beverages and Chemical equipment. The Company operates through its facilities at Pune, Chakan and Bhosari.

#### 2. Basis of preparation

The financial statements of the Company have been prepared on an accrual basis and under the historical cost convention except for certain financial instruments which have been measured at fair value. Historical cost is generally based on the fair value of consideration given in exchange of goods and services. The accounting policies are consistently applied by the Company during the period and are consistent with those used in previous year except where a newly issued accounting standard is initially adopted or a revision to an existing accounting standard requires a change in the accounting policy hitherto in use.

#### Going Concern:

The Company has ceased the manufacturing and trading activities and is not regarded as a going concern. Moreover, it doesn't foresee any possibility of revival in near future. Hence the financials are not prepared on going concern basis.

#### 3. Significant accounting policies:

#### a. Statement of compliance

These separate financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended thereafter. For all periods up to and including the year ended March 31, 2018, the Company prepared its financial statements in accordance with the accounting standards notified under section 133 of the Companies Act 2013, read together with paragraph 7 of the Companies (Accounts) Rules, 2014 (Indian GAAP). These financial statements for the year ended March 31, 2018 are the first separate financial statements that the Company has prepared in accordance with Ind-AS. Refer note 33 for an explanation of how the transition from Indian GAAP to Ind AS has affected the Company's financial position and financial performance.

#### b. Use of estimates and judgement

The preparation of these financial statements in conformity with the recognition and measurement principles of Ind AS requires the management of the Company to make estimates, judgements and assumptions. These estimates, judgements and assumptions affect the reported balances of assets and liabilities, disclosures relating to contingent liabilities as at the date of the financial statements and the reported amounts of revenues and expenses for the year. These estimates and underlying assumptions are reviewed on an ongoing basis.

Revisions to accounting estimates are recognised in the period in which the estimates are revised and future periods are affected. Although these estimates are based on the management's best knowledge of current events and actions, uncertainty about these estimates, judgements and assumptions may result in the outcome that may require material adjustment in the carrying amounts of assets and liabilities in future period.

Estimations which may cause material adjustment to the carrying amounts of assets and liabilities within next financial year is in respect of useful lives of property, plant and equipment, valuation of deferred tax assets, provisions and contingent liabilities and fair value measurement of financial instruments have been discussed below.

#### c. Property, plant and equipment

. 1

Property, plant and equipment are stated at cost, less accumulated depreciation and impairment loss, if any. #### d. Intangible Assets

Cost comprises the purchase price and any attributable cost of bringing the asset to its working condition for its intended use. Cost of internally generated intangible assets comprises all directly attributable costs necessary to create, produce, and prepare the asset to be capable of operating in the manner intended by management.

Capitalized development cost is carried at cost less accumulated amortization and impairment losses, if any. Intangibles under development include cost of intangibles that are not ready to be put to use.

#### f. Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

(i) Financial assets

#### (a) Initial recognition and measurement

11

#### Notes forming part of the Financial Statements

A financial asset is de-recognized when:

- The contractual rights to receive cash flows from the financial asset have expired, or
- The Company has transferred its contractual rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a pass-through arrangement and either
- (a) The Company has transferred substantially all the risks and rewards of the asset or

(b) The Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

#### g. Impairment

#### (i) Financial assets (other than at fair value)

The Company assesses at each reporting date whether a financial asset or a group of financial assets is impaired. Ind AS 109 requires expected credit losses to be measured through a loss allowance. The Company has used practical expedients in calculating expected credit losses on trade receivables using a provision matrix. The provision matrix takes into account historical credit loss experience for trade receivables to estimate the 12-month expected credit losses. The expected credit loss allowance is based on the ageing of the receivables that are due and allowance rates used in the provision matrix. For all other financial assets, expected credit losses are measured at an amount equal to the 12-months expected credit losses or at an amount equal to the life time expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition.

#### (ii) Non-financial assets

Tangible and intangible assets

Property, plant and equipment and intangible assets with finite life are evaluated for recoverability whenever there is any indication that their carrying amounts may not be recoverable. If any such indication exists, the recoverable amount for the individual asset is estimated by the Company. If, however, it is not possible to estimate the recoverable amount of the individual asset then the Company determines the recoverable amount of the cash-generating unit (CGU) to which the asset belongs (the asset's cash-generating unit). An impairment loss is recognised in the statement of profit and loss when the recoverable amount of the asset or CGU is less than the carrying amount of the asset or CGU.

Previously recognized impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If this is the case then the carrying amount of asset is increased to its recoverable amount. Such reversal is recognized in statement of profit and loss.

#### h. Revenue recognition

The Company mainly derives its revenues from manufacturing of dairy, Brewery and other equipment. The Company also earns revenues from sale of scrap.

Revenue is recognised upon satisfying the performance obligation by transferring promised goods or services to customers for a consideration which the Company expects to receive in exchange for those goods or services.

Revenue from sale of scrap is recognised when the goods are transferred to the customer and the customer obtains the control over that asset.

Revenue is measured based on the transaction price being the consideration received from the customer, adjusted for volume discounts, performance bonuses, price concessions and incentives, if any, as specified in the contract with the customer. Revenue also excludes taxes collected from customers.

## Notes forming part of the Financial Statements

All financial assets are recognized initially at fair value plus, in the case of financial assets not recorded at fair value through profit or loss, transaction costs that are attributable to the acquisition of the financial asset.

#### (b) Subsequent measurement

For purposes of subsequent measurement, financial assets are classified in three categories:

- Financial assets at amortized cost
- Financial assets at fair value through other comprehensive income (FVTOCI)
- Financial assets at fair value through profit or loss (FVTPL)

## (c) Financial assets at amortized cost:

A financial asset is measured at amortized cost if both following conditions are met:

- The financial asset is held within a business model whose objective is to hold financial assets in order to collect
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortized cost using the effective interest rate (EIR) method. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included in other income in the statement of profit and loss. The losses arising from impairment are recognized in the statement of profit and loss.

Financial assets at fair value through other comprehensive income

A financial asset is measured at fair value through other comprehensive income if both of the following criteria are met:

- The financial asset is held within a business model whose objective is achieved by both collecting contractual cash
- flows and selling the financial assets, and • The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

After initial measurement, such financial assets, until they are derecognized or reclassified, are subsequently measured at fair value and recognized in other comprehensive income except for interest income, gain/loss on impairment, gain/loss on foreign exchange which is recognized in the statement of profit and loss.

## (d) Financial assets at fair value through profit or loss

A financial asset is measured at fair value through profit or loss unless it is measured at amortized cost or at fair value through other comprehensive income.

In addition, the Company may elect to classify a financial asset, which otherwise meets amortized cost or fair value through other comprehensive income criteria, as at fair value through profit or loss. However, such election is allowed only if doing so reduces or eliminates a measurement or recognition inconsistency (referred to as 'accounting mismatch').

After initial measurement, such financial assets are subsequently measured at fair value in the statement of profit and loss.

### (e) De-recognition of financial assets

## Notes forming part of the Financial Statements

The Company provides accumulating and non-accumulating paid absences such as annual leave, sick leave and casual leave. Accumulating paid absences are partly vesting and non-vesting. The Company recognises the expected cost of accumulating paid absences as the additional amount that the entuty expects to pay as a result of the unused entitlement. Non-accumulating paid absences do not carry forward and are lapsed if the current period's entitlement is not used in full and do not entitle employees to a cash payment for unused entitlement on leaving the Company. The Company does not recognises any liability or expense until the time of the absence.

Compensated absences which are expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as undiscounted liability at the balance sheet date. Compensated absences which are not expected to occur within twelve months after the end of the period in which the employee renders the related services are recognised as an actuarially determined liability at the present value of the defined benefit obligation at the balance sheet date.

#### Borrowing costs n.

Borrowing costs are capitalized that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset. Other borrowing costs are recognised as an expense in the period in which it is incurred.

#### **Operating Lease** 0.

Lease arrangements where the risks and rewards incidental to ownership of an asset substantially vest with the lessor, are recognised as operating lease. Operating lease payments are recognised on a straight line basis over the lease term in the statement of profit and loss, unless the lease agreement explicitly states that increase is on account of inflation.

#### Foreign currency translation p.

(i) Functional and presentation currency Items included in the separate financial statements of the company are measured using the currency of the primary economic environment in which the entity operates ('the functional currency'). The separate financial statements are presented in Indian rupee (INR), which is the Company's functional and presentation currency.

Foreign currency transactions are recorded in Indian currency, by applying the exchange rate between the Indian currency and the foreign currency as at the date of transaction.

Monetary items, designated in foreign currencies are revaiued at the rate prevailing on the date of Balance Sheet.

Exchange differences arising on the settlement and conversion of foreign currency transactions are recognized as income or as expenses in the year in which they arise, except in cases where they relate to the acquisition of qualifying assets, in which cases they were adjusted in the cost of the corresponding asset.

#### Taxes

#### (i) Current tax

Current tax is the amount of tax payable based on the taxable profit for the year as determined in accordance with the applicable tax rates and the provisions of the Income tax Act, 1961.

Current tax assets and current tax liabilities are presented on the net basis in the balance sheet after off-setting current tax paid against income tax provision only if the Company has a legally enforceable right to set off the recognised amounts and it intends either to settle on a net basis.

## Notes forming part of the Financial Statements

#### Provisions and contingent liabilities r.

Provisions are recognized when the Company has a present, legal or constructive obligation as a result of a past event and it is probable that an outflow of resources will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made. Provisions are determined based on the best estimate required to settle the obligation at the Balance Sheet date. Provisions are reviewed at each Balance Sheet date and adjusted to reflect current best estimates.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate used to determine the present value is a pretax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. A disclosure for a contingent liability is made where there is a possible obligation arising out of past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation arising out of a past event where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

#### Earnings per share s.

a. Basic Earnings per Share

Basic earnings per share is calculated by dividing the net profit for the period attributable to equity shareholders by the weighted average number of equity shares outstanding during the financial year. Earnings considered in ascertaining the company's earnings per share is the net profit for the period after deducting any attributable tax thereto for the period. The weighted average number of equity shares outstanding during the period and for all periods presented is adjusted for events, such as bonus shares, other than the conversion of potential equity shares that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

# Notes forming part of the Financial Statements

Unbilled revenue represents excess of revenue earned over billings on contracts. Unbilled revenue is recognised when there is unconditional right to receive cash and there is no uncertainty of ultimate collection

Unearned or deferred revenue is recognised when there is billings in excess of revenue.

#### i. Interest Income

Interest on bank deposits is recognised on accrual basis.

#### j. Dividends

#### k. Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

#### I. Investment in subsidiaries

Investment in subsidiaries are measured at cost less impairment loss, if any.

#### m. Employee benefits

#### (i) Gratuity

The Company provides for Gratuity, a defined benefit obligation plan, covering eligible employees under Company Gratuity Scheme. At each reporting date, liabilities with respect to gratuity plan are determined by actuarial valuation performed by independent actuary. The Company uses the projected unit credit method to determine the present value of its defined benefit obligations and the related current service cost and, where applicable, past service cost. The Company recognizes the net obligation of a defined benefit plan in its Balance Sheet as an asset or liability. Remeasurements of the net defined benefit liability/ asset is recognised in other comprehensive income and are not reclassified to profit or loss in a subsequent period.

#### (ii) Provident fund

Contribution to provident fund is a defined contribution plan covering eligible employees. The Company and the eligible employees make a monthly contribution to the provident fund maintained by the Regional Provident Fund Commissioner equal to the specified percentage of the basic salary of the eligible employees as the scheme. The contributions to the provident fund are charged to the statement of profit and loss for the year, when the contributions are due. The company has no obligation, other than the contribution payable to the provident fund.

#### (iii) Short-term Employee Benefits

All employee benefits payable within twelve months of rendering the service are classified as short-term benefits. Such benefits include salaries, wages, bonus, short term compensated absences, awards, ex-gratia, performance pay etc. and are recognized in the period in which the employee renders the related service. A liability is recognised for the amount expected to be paid when there is a present obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

#### (iv) Compensated absences

#### Notes forming part of the Financial Statements

Minimum alternate tax (MAT) paid in a period / year is charged to the statement of profit and loss as current tax. MAT credit available is recognized as an asset only to the extent that there is convincing evidence that the Company will pay normal income tax during the period, i.e., the period for which MAT credit is allowed to be carried forward. In the year in which the Company recognizes MAT credit as an asset in accordance with the Guidance Note on Accounting for Credit Available in respect of Minimum Alternative Tax under the Income-tax Act, 1961, the said asset is created by way of credit to the statement of profit and loss and shown as "MAT Credit Entitlement." The Company reviews the "MAT credit entitlement" asset at each reporting date and writes down the asset to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

#### (ii) Deferred Tax

Deferred tax is provided using the balance sheet approach on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognized for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- ' In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognized for all deductible temporary differences, the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilized, except:

- When the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss
- In respect of deductible temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, deferred tax assets are recognized only to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which
  - Deferred tax assets are recognised for the carryforward of unused tax losses only if it is probable that future
- taxable profits will be available against which such deferred tax assets can be realized.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are re-assessed at each reporting date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted

Current and deferred taxes are recognized in the statement of profit and loss, except to the extent that it relates to items recognized in other comprehensive income or directly in equity.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off current tax assets against current tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

The fair value hierarchy is based on inputs to valuation techniques that are used to measure fair value that are either observable or unobservable and consists of the following three levels:

Level 1 — Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2— Inputs are other than quoted prices included within Level1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3—Inputs are not based on observable market data (unobservable inputs). Fair values are determined in whole or in part using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instrument nor are they based on available market data.
